**AN INTRODUCTION TO THE
PLATINUMX GENESIS**

The Genesis Story

When we set out to create the PlatinumX Genesis, our goal wasn't simply to improve RV security—it was to rethink it entirely. We asked a simple question: why should premium protection come with premium ongoing costs? Instead of building another expensive, bolt-on GPS communications device with annual subscriptions attached, we chose a different path. We engineered a single, intelligent system that delivers advanced security, connectivity, and peace of mind—without locking owners into ongoing fees. The result is PlatinumX Genesis: powerful, integrated, and refreshingly honest in its value.

Listening closely to our customers shapes everything we build. Time and again, RV owners have told us they already had reliable connectivity onboard—Starlink, 4G or 5G routers, even satellite systems—and didn't want to pay for a second subscription just so their alarm could talk to them. So we designed PlatinumX Genesis to work seamlessly with the communications you already own. No extra SIMs. No duplicated data plans. Just smart integration that respects your setup and your budget.

We also understand that connectivity isn't always left on. That's why PlatinumX Genesis goes a step further. If your onboard communications are powered down, the system can automatically wake your network only when it needs to send an alert or notification. It's security that adapts to how you travel—efficient, intelligent, and always ready when it matters most.

Beyond alarms and alerts, PlatinumX Genesis quietly watches over your system's health in the background. Our platform continuously monitors key conditions and notifies you if something needs attention, helping you prevent small issues from becoming big problems. It's not just about responding to incidents—it's about confidence, awareness, and staying one step ahead wherever the road takes you.

At its core, PlatinumX Genesis represents our belief that premium security should be built in, not bolted on—and paid for once, not over and over again. With alarm protection, GPS tracking, and Wi-Fi integration combined into one smart panel, global platform support, and no subscriptions required, PlatinumX Genesis delivers exceptional capability at an exceptional value. This is RV security, redefined.

PlatinumX Connectivity & Value Benefits

Everything Built-In

Alarm, GPS tracking, and Wi-Fi integration are combined into one smart panel—no extra modules, no hidden add-ons.

Instant Phone Alerts Anywhere

Stay connected with real-time notifications straight to your phone, whether you're nearby or across the world.

Starlink-Ready for Remote Coverage

Alarm, GPS tracking, and Wi-Fi integration are combined into one smart panel—no extra modules, no hidden add-ons.

Works With Your Existing Router

Uses your Starlink or 4G/5G caravan router, saving you from extra SIM cards or monthly data fees.

Exceptional Value

At just \$749 RRP, it delivers premium alarm + GPS functionality for far less than buying separate systems costing well over \$1000.

Global Platform Support

Built on a worldwide security platform, your system stays protected no matter where you travel.

PlatinumX – What It Means for You

Complete Interior & Entry Protection

Internal motion sensors and door sensors watch over your caravan day and night, notifying you the moment anything is opened or disturbed.

Caravan Brake Protection

If someone tries to move your caravan—even a little—PlatinumX automatically locks the caravan brakes and alerts you instantly. It also detects any attempt to tamper with the braking system, giving you total peace of mind when it's parked.

Powerful Deterrence with Siren & Flashing Lights

A 105dB siren and bright light flashing instantly scare off intruders and draw attention fast, keeping your caravan safe even when you're not nearby.

Fast, Hassle-Free Installation

PlatinumX installs in under half the time of comparable systems—meaning less downtime, no complicated wiring, and you're protected sooner.

PlatinumX – What It Means for You

Low Battery Safety Alerts

Get notified before your house battery gets too low, saving you from dead batteries, ruined trips, and unexpected power issues.

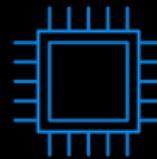

Smart Jamming Detection

If someone attempts electronic jamming to disable your alarm, PlatinumX detects it immediately and responds, keeping you protected even against advanced theft tactics.

Three Arming Modes to Suit Every Situation

Choose from Normal, Silent, or Night mode—so you stay protected whether you're away, arriving late, or sleeping inside.

Advanced Technology at Your Fingertips

Built on the latest control systems, PlatinumX gives you smoother performance, smarter alerts, and a more reliable security experience every day.

Frequently Asked Questions (FAQ)

Q. Will the system work if my Wi-Fi isn't on all the time?

A: Yes — without wasting power. Genesis intelligently powers up your router only when needed, then shuts it back down.

Q. Will I ever pay ongoing fees?

A: No — never. One purchase covers you for life with no subscriptions, SIM contracts or renewal fees.

Q. Does it work off-grid?

A: Yes. Genesis is fully compatible with Starlink, making it ideal for remote touring and national park camping.

Q. I don't have a router — can Genesis still work?

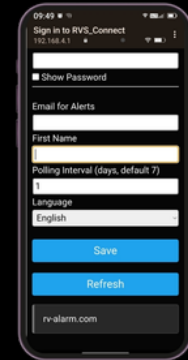

A: Yes. An optional 4G Wi-Fi dongle plugs into the Genesis USB port and uses a standard data-only SIM.

Q. What vehicles does it work with?

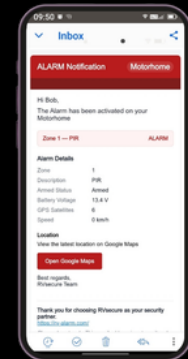

A: Genesis protects caravans, motorhomes and marine vessels — one system covers all three.

Q. Is it hard to install?

A: No. Genesis is designed for straightforward installation and comes with full documentation and support.

PlatinumX Genesis Additional Features List

- All PlatinumX Features
- Internal GPS
 - Navstar GPS (Worldwide)
 - Galileo (Europe)
- 250m Automatic Geofence when Armed
- Internal WiFi for connection to
 - Starlink
 - Eutelsat
 - Any 4G/5G wifi router
 - 4G WiFi dongle
- Alarm alerts via email & App (due 2026)
 - Zone Information (ie Zone 1 : PIR)
 - GPS Location
 - House Battery Voltage (incl low voltage alert)
- Regular system information and operational summary
- Monitors GPS polling and alerts user if connection missed
- Alarm can directly power WiFi router up to 1.2A (or switch relay for higher startup current requirements)
- Easy to set up via RVS_Connect WiFi
- Multi language support
- Additional sensors available including Cable Loop (exterior protection), CO2

Application Specific Features

Motorhome

- Arm/Disarm on Central Locking
- Ignition On Auto Disarm
- Anti-Tow Sensing

Caravan

- Auto Brake Locking**
- Brake Tamper Detection
- Stop Light Activation

Marine

- Engine Start Immobiliser Output
- Specialty Marine Sensors
 - Shore Power
 - Bilge Fail (Water)

Pacific and North America*

PlatinumX Genesis Kit Contents

PLATINUMX GENESIS CONTROL
 Functions as the central control unit for all wireless device communication and signal processing. Comes with inbuilt GPS Receiver and onboard WiFi.

PIR SENSOR
 Movement is detected through infrared sensing.

DOOR SENSOR
 Detects and alarms upon door opening.

SIREN
 A small but powerful 105dB alarm siren that activates in case of alarm.

REMOTES
 The remotes provide full control over the alarm system, including arming, disarming, and engaging night mode.

ALARM WARNING
 Warning stickers deter thieves by indicating an active alarm is present.

PlatinumX Genesis Options

EXTERNAL CABLE LOOP

The External Cable Loop provides perimeter security for external equipment and belongings, employing a design that minimises false alarm occurrences. Comes in 2.2m or 4.4m lengths.

ADDITIONAL PIR SENSORS

Add another PIR for larger vehicles to ensure all spaces are covered.

SHORE POWER SENSOR

The shore power sensor is a vital monitoring device designed to ensure uninterrupted electrical supply from shore power connections to a boat.

WATER/BILGE FAIL SENSOR

The water sensor is usually mounted within the hull of the boat, specifically above the waterline, where it can effectively detect the presence of water intrusion.

4G WiFi Dongle

The RVsecure Mini Router is the dedicated communication module that provides seamless integration with the PlatinumX Genesis system.

CO2 Sensor

Our CO2 sensor can be either stand alone, or paired to your PlatinumX Genesis providing the next level of safety. EN50291 certified.
